

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR A
NETWORK-BASED RESTAURANT SUPPLY CHAIN MANAGEMENT
FRAMEWORK**

5

ABSTRACT

A system, method and computer program product are disclosed for managing a supply chain utilizing a network. Data is received from a plurality of restaurants of a supply chain utilizing a network. This data relates to the sale of goods by the restaurants. An electronic order form for ordering a plurality of goods is then generated based on the data. The electronic order form is subsequently transmitted to at least one supply chain participant of the supply chain utilizing the network. Further, information relating to at least one of operations in the above process for managing the supply chain is tracked by the restaurant.
